Hi please for my final year project we are building a walking robot. We built the microcontroller from scratch and we wrote our code using mikroC for PIC. How to Make a Robot " Lesson 10: Programming Your Robot - Introduction Heart rate measurement indicates the soundness of the human cardiovascular system. This project demonstrates a technique to measure the heart rate by sensing the variation of the blood volume inside a finger artery, which is caused by the pumping action of the heart. Heart rate measurement from fingertip - Embedded Lab -
